## OSBORN PRO-TEK-TO Shoe Caps

Lightweight, temporary foot protection for plant visitors and your employees not wearing safety shoes. Slip on over shoes for added foot protection.

**Note:** Shoe Caps are not intended to replace steel-toed safety shoes.

**Construction:** High-impact plastic for shock resistance. Easy to slip on and off, shoe caps are held securely in place by a durable rubber harness. Weigh only 5-6 1/2 oz. per pair. Lightweight Toe Caps give temporary foot protection for visitors and for employee use in areas with marginal impact hazards. Protects from impact and compression equivalent to a Class 30 steel-toe shoe. Foot Caps offer extended protection over instep when used as a

supplement to safety shoes.
